PRODUCT: «CART» // DESIGN: LUCA NICHETTO
MANUFACTURER: BONALDO // INFO: WWW.BONALDO.COM

THE STORY: «I wanted a product that would get noticed, yet its design had to be based on functionality,» comments designer Luca Nichetto. «The Cart has a rather '1950s design and a very particular shape, especially when viewed from the back. When stacked, the chairs are kept together by means of a mechanism similar to the one used for supermarket trolleys — the shopping carts from which the product takes its name.» // **THE DETAILS:** Conceived as a chair for the home, the Cart will also suit many other environments. The supporting structure comes in painted metal. Comfort is guaranteed by soft, thick polyurethane for the seat and backrest, and by the chair's ergonomic design. The Cart is available in grey, white, red, anthracite and ivory. //
